

21 April 2023

PRESS RELEASE

International event at AGH UST

On 17-21 April at the AGH University of Science and Technology in Krakow, working meetings, workshops and university guest lectures aimed at strengthening international cooperation and broadening research and teaching horizons took place. Invited guests and presenters among others included representatives from Universities from Vietnam, Dominican Republic, China, Indonesia, Azerbaijan, Uzbekistan, Tajikistan, Albania or Malaysia.

During the event, interesting lectures on activities aimed at building bridges in international cooperation, strengthening academic ties and opening up to new research and teaching challenges were presented. The initiative also provided a space for the exchange of ideas, experiences and knowledge on the directions of the raw materials sector in the world, and enabled the presentation of the RaVeN education programme, which perfectly fits into the process of internationalising and connecting students, creating diversity and developing their professional and intercultural competences.
