

PRESS RELEASE

RaVeN Info Day: Part 1

Are you looking to advance your career in mining engineering and sustainability? If so, the RaVeN master's programme may be the perfect choice for you! RaVeN is an innovative and forward-thinking master's programme that prepares students with up-to-date specialised practical knowledge about the sustainable exploitation of raw materials throughout the entire value chain. This includes sourcing, processing, use, recycling, and back to sourcing.

On May 12, from 9 to 11 am (CEST), we are excited to host an online Open Day event to give you a chance to explore the RaVeN master's programme. During the event, you'll get to meet with faculty members, current students, and programme representatives to learn more about the curriculum, research opportunities, and facilities available. You'll also have the opportunity to ask questions and get a feel for the programme's culture and community.

The RaVeN MSc is not just about acquiring specialised knowledge and skills; it also fosters creativity, innovation, and entrepreneurship. We aim to prepare our graduates to implement innovative solutions at their workplaces or to start and run their businesses successfully.

So, what are you waiting for? Register now for our RaVeN Open Day event and discover why our master's programme is the perfect choice for your postgraduate studies in mining engineering and sustainability.
